

SD1: Pb isotopic ratios of K-feldspar for individual locations. Error bars are indicated on data points. Potential source domains are represented as coloured polygons.

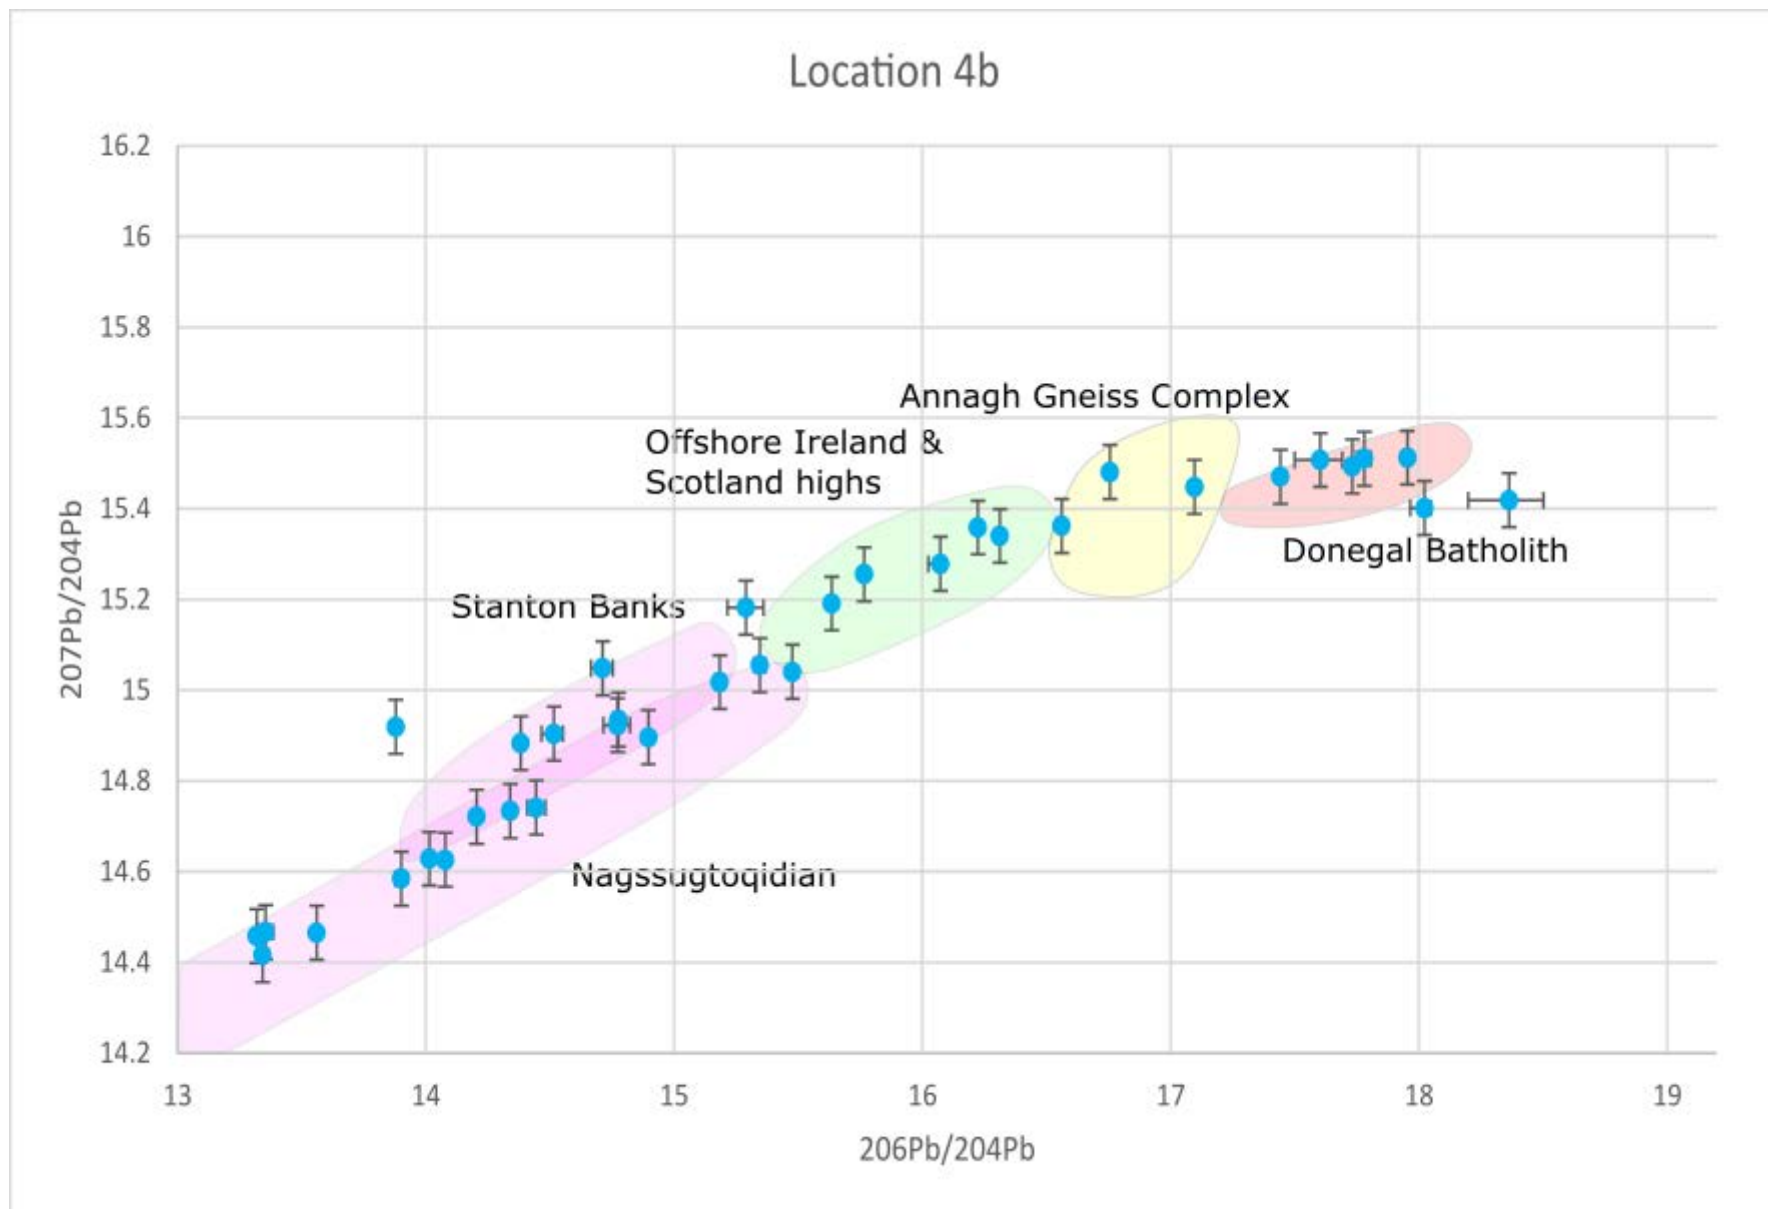

*SD2: Pb isotopic ratios of K-feldspar for individual locations. Error bars are indicated on data points. Potential source domains are represented as coloured polygons.*

SD3: Pb isotopic ratios of K-feldspar for individual locations. Error bars are indicated on data points. Potential source domains are represented as coloured polygons.

SD4: Pb isotopic ratios of K-feldspar for individual locations. Error bars are indicated on data points. Potential source domains are represented as coloured polygons.

SD5: Pb isotopic ratios of K-feldspar for individual locations. Error bars are indicated on data points. Potential source domains are represented as coloured polygons.
