

	NAME OF THE SITE	REFERENCE	DISTRICT	GEOLOGICAL CONTEXT	ASSEMBLAGE RECOVERED
CENTRAL INDIA					
1	Burwaha	IAR, 1970-1971	West Nimar	Artefacts from first and second gravel layers	Pebble tools
2	Mortaka	IAR, 1970-1971	West Nimar	Artefacts from first and second gravel layers	Pebble tools
3	Durkadi Nullah	IAR, 1970-1971	West Nimar	Black Cotton Soil overlaying silt, overlaying gravel (Topmost, Middle and Lower), overlaying basalt bed	Pebble artefacts from the gravel layer. Toolkit includes choppers (unifacial and bifacial), big and small side scrapers, discoids, scrapers made on flat pebble, unworked flake and chips, large number of cores on both flake and cobbles.
4	Jannod	IAR, 1959-1960	Mandasore	Artefacts from terrace system and gravels of Chambal and boulder conglomerate bed	Handaxes, cleavers, ovate, discoids, scraper cum cleaver in situ in upper gravel, Series II artefacts from third gravel layer and loose sand deposition layer.
5	Kotha	IAR, 1959-1960	Guna	Implimentiferous gravel underlaying 12 ft. thick silt deposit.	Series II tools found on the river bed of Betwa.
6	Piparia	IAR, 1959-1960	Narsinghpur	Gravel bed	Artefacts belong to the pebble industry and were reported to be similar to those found in basal layers of second bed at Olduvai Gorge. Acheulean tools observed just above the second gravel.
7	Thaned	IAR, 1959-1960	Mandasore	High Level Gravel running parallel to the stream for nearly half a mile	Pebble tools and Clactonian cleavers found.

8	Takari	IAR, 1959-1960	Mandasore	High Level Gravel running parallel to the stream for nearly half a mile	Pebble tools and Clactonian cleavers found.
9	Shivna R.	IAR, 1959-1960	Mandasore and Nahargarh Districts	Superimposition of gravel and tools	Second gravel with occasional occurrences of Series II artefacts made on yellow red and green jasper, overlaying older gravel. Series I tools with large cores and scrapers recovered from older gravel
10	Nahargarh	IAR, 1959-1960	Nahargarh	Single loose gravel noticed on east bank of Chambal river	Few cleaver and discoids found over the gravel. Which also yielded Series II tools including scrapers and fluted cores.
11	Retam R.	IAR, 1959-1960	Narsinghpur	Recent loose gravel deposit	Series II tools on jasper along with handaxes, cleavers and discoids.
12	Bandol	IAR, 1959-1960	Seoni	5ft. thick bed of coarse pebble gravel overlying Deccan trap. Overlain by 15 ft. brownish silt.	Large choppers, discoidal cores, and scrapers on large flakes.
13	Chhapara	IAR, 1959-1960	Seoni	Fine grained consolidated gravel	Series II type of artefacts. Toolkit: points, borers in chert, shouldered points, adze or axe like tools and thick blades.
14	Suakhera	IAR, 1959-1960	Seoni	Fine grained consolidated gravel	Series II type of artefacts. Toolkit: points, borers in chert, shouldered points, adze or axe like tools and thick blades.
15	Alonia	IAR, 1959-1960	Seoni	Fine grained consolidated gravel	Series II type of artefacts. Toolkit: points, borers in chert, shouldered points, adze or axe like tools and thick blades.

16	River Murna (Tributary of river Son)	IAR, 1965-1966	Shahdol	Sandstone bed capped with 1 m thick well cemented gravel with an eroded top. Another section observed with pebbly gravel in clay.	Late Stone Age artefacts including scrapers and blades, made on chert and chalcedony, collected from the eroded surface. Middle Stone Age artefacts on greenish chert recovered from the pebbly gravel in clay.
17	Ganesh Nullah	IAR, 1966-1967	West Nimar	Bouldary gravel at water level. 3m thick gravel resting on rock overlain by red brown kankary silt.	Early Stone Age artefacts from the bouldary gravel.
18	Maheshwar,	IAR, 1966-1967	West Nimar	Bouldary gravel overlaying red brown kankary silt, capped by yellow brown kankary silt.	Early Stone Age artefacts yielded from this gravel.
19	Kasrod Nullah	IAR, 1966-1967	West Nimar	Bouldary gravel overlaying red brown kankary silt, capped by yellow brown kankary silt.	Early Stone Age artefacts yielded from this gravel.
20	Kalghat	IAR, 1966-1967	West Nimar	Bouldary gravel overlaying red brown kankary silt, capped by yellow brown kankary silt.	Early Stone Age artefacts yielded from this gravel.
21	Ganbgakheri and Katghara Village	IAR, 1982-1983	22°14' 72°2' 22°13' 76°1'	Weathered bouldary gravel	In-situ Lower Palaeolithic artefacts
22	Katghara Village	IAR, 1982-1983	22°14' 72°2' 22°13' 76°1'	Weathered bouldary gravel	In-situ Lower Palaeolithic artefacts
23	Seonath River	IAR, 1982-1983	From Simga to Amlidih	On preserved alluvial sections on both the banks two types of gravel observed: High level and low level. Such section observed near Karamsen, Nandghat, Limtara and Tulsi	Middle palaeolithic and upper palaeolithic tools yielded from these sections in stratified context. Middle Palaeolithic toolkit comprising of choppers, miniature handaxes, borers, scrapers, flakes on chert, jasper and chalcedony, found on ground and from basal gravel layers. Upper Palaeolithic sites located at high level ground yielding scrapers, borers, burins, blades, flakes, and cores dominantly made on chert and sometimes on chalcedony and jasper.
24	Biana Nala	Singh, R., 1965	Lalitpur	Cemented gravel	Cleavers and Handaxes.

25	Rehla	IAR, 1958-1959	Sonar Valley	Highly cemented gravel bed	Handaxe, ovate cleaver, scrapers, pebble cores, unworked flakes and bifacial choppers.
26	Ghogra	IAR, 1958-1959	Sonar Valley	Highly cemented gravel bed	Handaxe, ovate cleaver, scrapers, pebble cores, unworked flakes and bifacial choppers.
27	Khoja Kheri	IAR, 1958-1959		Loosely consolidated gravel overlying partially consolidated, fine gravel and cross bedded gravel.	Series II artefacts comprising of scrapers, flakes and unifacial points on chert, recovered from loosely consolidated gravel and partially consolidated gravel.
28	Kopra	IAR, 1958-1959		Loosely consolidated gravel overlying partially consolidated, fine gravel and cross bedded gravel.	Series II artefacts comprising of scrapers, flakes and unifacial points on chert, recovered from loosely consolidated gravel and partially consolidated gravel.
29	Bhilsa to Mungaoli	IAR, 1958-1959	Betwa river	Disturbed gravel	Six stone age sites with assemblages comprising of cleavers, handaxes and flakes.
30	Maheshwar	IAR, 1958-1959	Maheshwar	Three terraces: Terrace I consist large pebble gravel overlain by fine yellow silt. Terrace II: lower part consist of small trap gravel and sand, highly calcareous and fairly well cemented.	Terrace I yielded Series I type of artefacts comprising of flakes, cleavers, handaxes and huge cores. Terrace II yielded Series II type of artefacts.
31	Balri	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores and discoidal cores made on chert and quartzite.
32	Bhadugaon	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper

					Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores and discoidal cores made on chert and quartzite.
33	Bhamori	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores and discoidal cores made on chert and quartzite.
34	Dhenki	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores and discoidal cores made on chert and quartzite.
35	Handia	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores and discoidal cores made on chert and quartzite.
36	Hirapur Khadan	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores and discoidal cores made on chert and quartzite.
37	Joga Kalan	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores

					and discoidal cores made on chert and quartzite.
38	Malpone	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores and discoidal cores made on chert and quartzite.
39	Mangrol	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores and discoidal cores made on chert and quartzite.
40	Nayapura	IAR, 1974-1975	Harda	Lateritic Gravel and Shingle bed.	Early and Middle Stone Age sites comprising of handaxes, cleavers, flakes and flake tools of Upper Acheulean character. Middle Stone Age tools comprise of scrapers, points, cores and discoidal cores made on chert and quartzite.
41	Devakachar (Talaya Ghat, Gauri Umaria and Ratikarar)	IAR, 1981-1982	Narsinghpur	Cemented gravel capped by yellow or red silt and loose gravel.	Lower Palaeolithic, Middle Palaeolithic and Mesolithic artefacts.
42	Rampura	IAR, 1985-1986	Narsinghpur	Red colored sandy pebbly gravel	Scraper, handaxe, cleaver, discoids, amorphous cores and flakes.
43	Chinki	Salahuddin, 1987	Narsinghpur	Unconsolidated gravely pebbly river bed	Early Acheulean artefacts
44	Behagaon	IAR, 1984-1985		Surface of weathered gravel	Middle Palaeolithic assemblage
45	Choral confluence	IAR, 1984-1985		Weathered gravel	Lower Palaeolithic assemblage
46	Ganesh Nala	IAR, 1984-1985		Surface of weathered gravel	Middle Palaeolithic assemblage
47	Gangatkheri	IAR, 1984-1985		Weathered gravel	Lower Palaeolithic assemblage
48	Mehtakheri	IAR, 1984-1985		Weathered gravel	Lower and Middle Palaeolithic assemblage
49	Nisarpur	IAR, 1984-1985		Surface of weathered gravel	Middle Palaeolithic assemblage

50	Umeria	Salahuddin (unpublished, 1987) VSG	Narsinghpur	Unconsolidated Sandy pebble gravel	Late Acheulean artefacts.
51	Guarighat	Salahuddin (unpublished, 1987) VSG	Narsinghpur	Unconsolidated Sandy pebble gravel	Late Acheulean artefacts.
52	Belghat	Salahuddin (unpublished, 1987) VSG	Narsinghpur	Unconsolidated Sandy pebble gravel	Late Acheulean artefacts.
53	Bina Rivers	IAR, 1960-1961		Rubble gravel overlain by sandy silt and underlain by yellowish silt	Series II type artefacts comprising of cordiform bifaces, side and end scrapers, points, discoids, side scrapers and discs.
54	Dhasan Rivers	IAR, 1960-1961		Rubble gravel overlain by sandy silt and underlain by yellowish silt	Series II type artefacts comprising of cordiform bifaces, side and end scrapers, points, discoids, side scrapers and discs.
55	Mohari	IAR, 1960-1961		Loose gravel	Series I
56	Bheraghat	IAR, 1960-1961	Jabalpur	Lower gravels and clay of Narmada	Handaxes, cleavers, and choppers from lower gravels. Blade and flake tools were recovered from upper gravels and clay along with mammalian fossils.
57	Hathnora	Salahuddin <i>et al.</i> (1985). On the archaeological association of the fossil hominid form Hathnora, Madhya Pradesh, India. <i>Ancient Perspectives</i> . 27 (2)		Cemented bouldary-pebbly gravel	Late Acheulean artefacts comprising of cores, discoidal cores, side flake, end flake and indeterminate flake and scrapers. A partial hominin crania was also discovered.
58	Samnapur	Misra, V.N., <i>et al.</i> (1990) Geoarchaeology of the Palaeolithic Site at Samnapur in the Central Narmada Valley. <i>Man and Environment</i> XV(1)	Devakachar	Reddish sticky clay overlain by colluvio-alluvial gravel overlain by reddish brown silt overlain by rubble lens overlain by yellowish brown silt	Fresh as well as rolled Acheulean artefacts in colluvio-alluvial silt and Middle Palaeolithic artefacts along with fossils in the rubble lens.

59	Ghora Kota	IAR, 1958-1959	Sagar	Well cemented gravel	Three tools including one pebble tool in-situ the well cemented gravel layer
60	Bahmana	IAR, 1960-1961	Mandla	Unconsolidated gravel in the exposed section along river Narmada	Upper Palaeolithic and Microlithic assemblage.
61	Narmada to sea	IAR, 1961-1962	Gujarat	Cemented Gravel	Handaxe-cleaver complex.
62	Banke-siddha	IAR, 1961-1962	Banda	Gravel bed from a nullah adjacent to the site	Few chopper tools.
63	Durendi	IAR, 1961-1962	Banda	Implimentiferous gravel layer capped by thick alluvium	Unknown artefactual composition.
64	Sitapur	IAR, 1961-1962	Banda	Gravel bed of the river	Early and Middle stone age tools.
65	Chopan	IAR, 1962-1963	Robertsganj	Gravel-bed of Son river	Rolled and patinated Middle Stone Age tools.
66	Reha	IAR, 1964-1965		Reddish gravelly soil	Bladelets, few crescents and cores.
67	Subarnarekha Valley	IAR, 1964-1965		Decomposed granite overlain by gravel bed underlaying yellow brown soil.	Handaxes and choppers on quartz and quartzite
68	Rampura	IAR, 1965-1966	Mandasore	Cemented gravel	Early Stone Age artefacts
69	Hanuman Bahari	IAR, 1968-1969		Cemented and uncemented gravels	Pebble tools from cemented gravels and upper palaeolithic artefacts from uncemented gravels.
70	Gaya	IAR, 1969-1970	Gaya	Basal gravel capped by red-brown silt	Early and Middle Stone Age artefacts.
71	Lela Bandha Nullah	IAR, 1973-1974	Hazaribagh	Gravel bed	Early Stone Age artefacts.
72	Dhalua Nullah	IAR, 1973-1974	Melinda	Cemented gravel	Middle Stone Age artefacts comprising of side scrapers, concave scrapers and blades.
73	Chaura	IAR, 1980-1981	Mirzapur	Cemented gravel	Middle Palaeolithic artefacts
74	Bijaura	IAR, 1980-1981	Mirzapur	Alternating layers of loose gravel and very coarse sand	Middle Palaeolithic artefacts from the gravel
75	Chopan	IAR, 1980-1981	Mirzapur	Cross bedded gravel-sand deposit	Middle Palaeolithic tools in this deposit.

76	Mahagarha	IAR, 1981-1982	West Belan	Planar and cross bedded sandstone gravel overlaying Intra-formational gravel	Middle Palaeolithic artefacts were discovered from planar and cross bedded gravel. Upper to epi-palaeolithic or Mesolithic (25000-1000 BP) artefacts were observed in Intra-formational gravel.
77	Chillahia	IAR, 1981-1982	West Belan	Planar and cross bedded sandstone gravel overlaying Intra-formational gravel	Middle Palaeolithic artefacts were discovered from planar and cross bedded gravel. Upper to epi-palaeolithic or Mesolithic (25000-1000 BP) artefacts were observed in Intra-formational gravel.
78	Chopani-Mandi	IAR, 1981-1982	West Belan	Planar and cross bedded sandstone gravel overlaying Intra-formational gravel	Middle Palaeolithic artefacts were discovered from planar and cross bedded gravel. Upper to epi-palaeolithic or Mesolithic (25000-1000 BP) artefacts were observed in Intra-formational gravel.
79	Deoghat bridge	IAR, 1981-1982	West Belan	Planar and cross bedded sandstone gravel overlaying Intra-formational gravel	Middle Palaeolithic artefacts were discovered from planar and cross bedded gravel. Upper to epi-palaeolithic or Mesolithic (25000-1000 BP) artefacts were observed in Intra-formational gravel.
80	Baghor	IAR, 1981-1982	Mid-Son Valley	Water laid sandstone cobbles and gravels overlaying Sihawal gravel further overlaying Patpara formation, gravelly clays and fluvialite depositions	Large core and flake, possibly Upper Palaeolithic artefacts have been recovered from topmost layer. Lower Palaeolithic artefacts discovered from the Sihawal gravel and Upper Acheulean to Middle Palaeolithic artefacts observed in Patpara formation.
81	Nakjhar Khurd	IAR, 1981-1982	Mid-Son Valley	Water laid sandstone cobbles and gravels overlaying Sihawal gravel further overlaying Patpara formation,	Large core and flake, possibly Upper Palaeolithic artefacts have been recovered from topmost layer. Lower Palaeolithic artefacts discovered from

				gravelly clays and fluvialite depositions	the Sihawal gravel and Upper Acheulean to Middle Palaeolithic artefacts observed in Patpara formation.
82	Rampur	IAR, 1981-1982	Mid-Son Valley	Water laid sandstone cobbles and gravels overlaying Sihawal gravel further overlaying Patpara formation, gravelly clays and fluvialite depositions	Large core and flake, possibly Upper Palaeolithic artefacts have been recovered from topmost layer. Lower Palaeolithic artefacts discovered from the Sihawal gravel and Upper Acheulean to Middle Palaeolithic artefacts observed in Patpara formation.
83	Neodhia Bayalis	IAR, 1985-1986	9 km downstream from Baraundha	Gravel III overlain by red clay overlain by cemented by Gravel II overlain by cemented gravel I capped by silt.	Lower and Middle Palaeolithic artefacts and animal fossils discovered.
84	Maihar	IAR, 1987-1988	Satna	Gravel I of river section, 17m below the occupation level	Acheulean artefacts.
85	Jhadwa Nullah	IAR, 1989-1990	Mirzapur	Basal Bouldary gravel	Acheulean artefacts
86	Dhansi	IAR, 2012-2013	Hoshangabad	Pebble and artefact horizon (PAH)	Variety of cores and flakes
PENINSULAR INDIA					
87	Atner	Mishra, Sheila, Kale, V.S., Kshirsagar, Anupama. 1993. <i>High Level Gravel Occurrence near Atner on the Tapti River</i> . Bulletin of the DCPRI (53)	Tapti River	High level occurrences reported across Godavari, middle Krishna, Tungabhadra, and Mahi; Stone age artefacts reported from the surface of HLG; South side of the Tapti river extensive spread of chalcedony and quartz cobbles and pebbles; siliceous rocks are mostly angular and rounded basalt pieces occur; a few well rounded laterite pebbles also found; most of the HLG pre Acheulean in age;	
88	Between Prakashe and Kukurmunde	IAR, 1956-1957	Tapti River	Coarse gravel capped by 30 ft. silt deposit	Artefacts comprising of side, end and hollow scrapers.
89	Lad-Mod	IAR, 1954-1955	Pravara river	Gravel	Acheulean artefacts, discovered on trap rock, comprised of small core, flakes, scrapers, blades and burins of jasper, carnelian and other soft material along

					with mammalian fossils in cemented gravel.
90	Shivyogamandir	IAR, 1955-1956	Badami	Pebble bed	Series I tools only.
91	Anagwadi	IAR, 1955-1956	Ghataprabha	Pebble bed	Succession of tools from Series I, II and III
92	Bagalkot	IAR, 1955-1956	Ghataprabha	Pebble bed	Succession of tools of Series I and Series II
93	Herkal	IAR, 1955-1956	Karnataka	Pebble bed	Series I and Series II artefacts
94	Nevasa	IAR, 1955-1956	Ahmadnagar	Gravel deposits	Series I and Series II artefacts
95	Gangapur	IAR, 1956-1957	Upper Godavari valley	Coarse pebbly conglomerate loosely cemented by gravelly matrix and separated by river bedrock overlaying a compact gravel bed.	Palaeolithic artefacts were discovered in upper part of the conglomerate and the overlaying gravel. Handaxes, cleavers, ovate and flakes were discovered from the compact gravel bed.
96	Deccan College premises	IAR, 1956-1957	Pune	Gravel	Series II artefacts including burins.
97	Khed	IAR, 1956-1957	Pune	Stratified Gravel	Series II artefacts were discovered from within stratified gravel and both Series I and II artefacts were observed on surface of the gravel.
98	Kandivali	IAR, 1957-1958	Padan Hill, Ulhas River	Weathered deposit of reddish earth and gravel	Different industries discovered (confirm from Todd's survey)
99	Bhondgaon	IAR, 1957-1958	Khandesh	Compact gravel conglomerate and loose calcareous pebble conglomerate	Abevellio-Acheulean handaxes, cleavers, discoids, scrapers etc., on trap and quartzite together with pebble tools were reported.
100	Amoda	IAR, 1957-1958	Khandesh	Compact gravel conglomerate and loose calcareous pebble conglomerate	Abevellio-Acheulean handaxes, cleavers, discoids, scrapers etc., on trap and quartzite together with pebble tools were reported.
101	Chopargaon	IAR, 1957-1958	Khandesh	Loose gravel conglomerate bed	Series II artefacts made on chert, jasper, and chalcedony reported.
102	Shajipur	IAR, 1957-1958	Khandesh	Loose gravel conglomerate bed	Series II artefacts made on chert, jasper, and chalcedony reported.
103	Thalner	IAR, 1957-1958	Khandesh	Loose gravel conglomerate bed	Series II artefacts made on chert, jasper, and chalcedony reported.
104	Manjrod	IAR, 1957-1958	Khandesh	Loose gravel conglomerate bed	Series II artefacts made on chert, jasper, and chalcedony reported.

105	Yadhoda	IAR, 1957-1958	Khandesh		Loose gravel conglomerate bed	Series II artefacts made on chert, jasper, and chalcedony reported.
106	Shajipur	IAR, 1957-1958	Khandesh		2 ft. thick deposit of cemented gravel overlaying yellow silt mixed with kankar resting on loose gravel conglomerate bed yielding Series II artefacts	Blades, points, scrapers and awls belonging to Series III type reported.
107	Chorgain	IAR, 1957-1958	Khandesh	District, around Tapti river	2 ft. thick deposit of cemented gravel overlaying yellow silt mixed with kankar resting on loose gravel conglomerate bed yielding Series II artefacts	Blades, points, scrapers and awls belonging to Series III type reported.
108	Amoda	IAR, 1957-1958	Khandesh	District, around Tapti river	2 ft. thick deposit of cemented gravel overlaying yellow silt mixed with kankar resting on loose gravel conglomerate bed yielding Series II artefacts	Blades, points, scrapers and awls belonging to Series III type reported.
109	Thalner	IAR, 1957-1958	Khandesh	District, around Tapti river	2 ft. thick deposit of cemented gravel overlaying yellow silt mixed with kankar resting on loose gravel conglomerate bed yielding Series II artefacts	Blades, points, scrapers and awls belonging to Series III type reported.
110	Chorgaon	IAR, 1957-1958	Khandesh	District, around Tapti river	2 ft. thick deposit of cemented gravel overlaying yellow silt mixed with kankar resting on loose gravel conglomerate bed yielding Series II artefacts	Blades, points, scrapers and awls belonging to Series III type reported.
111	Manjrod	IAR, 1957-1958	Khandesh	District, around Tapti river	2 ft. thick deposit of cemented gravel overlaying yellow silt mixed with kankar resting on loose gravel conglomerate bed yielding Series II artefacts	Blades, points, scrapers and awls belonging to Series III type reported.
112	Mudavad	IAR, 1957-1958	Khandesh	District, around Tapti river	2 ft. thick deposit of cemented gravel overlaying yellow silt mixed with kankar resting on loose gravel conglomerate bed yielding Series II artefacts	Blades, points, scrapers and awls belonging to Series III type reported.

113	Yadhoda	IAR, 1957-1958	Khandesh District, around Tapti river	2 ft. thick deposit of cemented gravel overlaying yellow silt mixed with kankar resting on loose gravel conglomerate bed yielding Series II artefacts	Blades, points, scrapers and awls belonging to Series III type reported.
114	Bund Garden	IAR, 1957-1958	Mula-Mutha river	Gravel	One Series I palaeolithic and a number of Series II Palaeolithic artefacts
115	Shikarpur	IAR, 1957-1958	Poona District	Highly cemented gravel bed	Basaltic and dolerite flakes and pebble artefacts.
116	Rushikonda	Reddy, K.T., Prakash, P.V., Rath, Alok, Rao, U.B., 1995. <i>A Pebble Tool Assemblage on the Visakhapatnam Coast</i> . Man and Environment XX (1)	North of Visakhapatnam; 17°33'25" N; 83°23'03" E	Alluvial and Marine origin; Wave-cut Rock terrace, three parallel beach ridges at different elevations; Bolder and pebbles laid in ferruginous matrix found on the surface—artefacts from this layer and underlying fine gravel; TRENCH- 1.10m- 7 layers; pebbly bouldary layer at 45 cm;	Middle and Upper Palaeolithic, Mesolithic and Neolithic artefacts found on the surface—simple blades, backed blades, transverse arrowhead, burins, borers, points, cores, flakes, chips; Archaeological evidence from junction of the pebbly and bouldary gravel—artefacts made on split pebbles and split flakes; pebbles were flattish to sub rounded; unifacial choppers, worked split flakes, used split flakes, split pebbles, split flakes and anvil.
117	Kurnool District 46 sites (names not available)	IAR, 1958-1959	Kurnool District, Andhra Pradesh	Gravel deposits	Lithics belonging to Series I, II and III reported
118	Udhamgadh	IAR, 1958-1959	West Khandesh. Tapti River Valley	Gravel bed	In situ artefacts belonging to Series II reported
119		IAR, 1959-1960	Kurnool District, Andhra Pradesh	Two flood terraces followed by modern flood tool; Two gravel deposits in association with deposits of the river	Gravel associated with first terrace yielded Series I type tools including some fresh Series II type tools; Younger gravels related to second terrace yielded artefacts belonging to later types with sometimes heavily rolled artefacts from earlier Series.
120	Nandur- Madhmeswar	IAR, 1959-1960	Godavari River	Second gravel, laying on a small terrace (terrace II)	Series II type tools and occasionally Series I type tools
121	Tamasvadi	IAR, 1959-1960	Godavari River	Second gravel, laying on a small terrace (terrace II)	Series II type tools and occasionally Series I type tools

122	Belpandri	IAR, 1959-1960	Godavari River	Second gravel, laying on a small terrace (terrace II)	Series II type tools and occasionally Series I type tools
123	Suregaon	IAR, 1959-1960	Godavari River	Second gravel, laying on a small terrace (terrace II)	Series II type tools and occasionally Series I type tools
124	Bhalgain	IAR, 1959-1960	Godavari River	Second gravel, laying on a small terrace (terrace II)	Series II type tools and occasionally Series I type tools
125	Mehenduri	IAR, 1959-1960	Pravara River	Second gravel, laying on a small terrace, terrace II	Series II type tools and occasionally Series I type tools; along with animal fossils;
126	Gangapur	IAR, 1959-1960	Godavari	Reddish clay overlain by junction of clay and gravel	Series I tools consisting of cleavers, scrapers, flakes, choppers and chopping tools at the junction of clay and gravel and in gravel itself.
127	Wagheda	IAR, 1959-1960	Chanda District	Thick layer of alluvium underlain by well cemented gravel	Pebble handaxe, chopper, massive handaxe and a chopper extracted from the top of well cemented gravel.
128	Khaira	IAR, 1959-1960	Nagpur District	Sandy gravel lying on weathered Deccan trap	35 artefacts were reported including scraper-blade-flake assemblage made on chert. The assemblage consisted of tortoise cores, discoidal cores, scrapers, points and choppers.
129	Pardi	IAR, 1959-1960	Wardha District	Compact gravel	Unknown composition
130	Papamiya ki Tekdi	IAR, 1960-1961	Chanda District, Maharashtra	Exposed gravel of Jharpat river, tributary of Wardha. Gravel overlaying thick deposit of silt	Abevellio- Acheulean handaxes and cleavers, along with blades, scrapers, burins, borers, awls etc. early Series II sites, scrapers, borers and diminutive handaxes.
131	Jhari- Mangmal	IAR, 1960-1961	Chanda District, Maharashtra	Gravel-conglomerate	Bifacial pebble choppers, Abevellio-Acheulean handaxes and cleavers.
132	Dabkaheti	IAR, 1960-1961	Chanda District, Maharashtra	Well exposed gravel sections	Handaxes, cleavers and unifacial choppers.
133	Khaparla-Khurd,	IAR, 1960-1961	Chanda District, Maharashtra	Well exposed gravel sections	Handaxes, cleavers and unifacial choppers.
134	Khapri	IAR, 1960-1961	Chanda District, Maharashtra	Well exposed gravel sections	Handaxes, cleavers and unifacial choppers.
135	Mahalgaoon	IAR, 1960-1961	Chanda District, Maharashtra	Well exposed gravel sections	Handaxes, cleavers and unifacial choppers.

136	Minjhari	IAR, 1960-1961	Chanda Maharashtra	District,	Well exposed gravel sections	Handaxes, cleavers and unifacial choppers.
137	Titwi	IAR, 1960-1961	Chanda Maharashtra	District,	Well exposed gravel sections	Handaxes, cleavers and unifacial choppers.
138	Umri	IAR, 1960-1961	Chanda Maharashtra	District,	Well exposed gravel sections	Handaxes, cleavers and unifacial choppers.
139	Mandal	IAR, 1960-1961	Dhulia District		Fine reddish gravel	Two palaeoliths were reported, Ovate of Acheulean type and a flake. Late Stone Age artefacts were also reported.
140	Bhana	IAR, 1960-1961	Dhulia District		Fine reddish gravel	Late Stone Age and microlithic artefacts along with fossilized animal bone were recovered.
141	Champala	IAR, 1960-1961	Dhulia District		Fine reddish gravel	Late Stone Age and microlithic artefacts along with fossilized animal bone were recovered.
142	Nagsar	IAR, 1960-1961	Dhulia District		Fine reddish gravel	Late Stone Age and microlithic artefacts along with fossilized animal bone were recovered.
143	Nandurbar	IAR, 1960-1961	Dhulia District		Fine reddish gravel	Late Stone Age and microlithic artefacts along with fossilized animal bone were recovered.
144	Shetti	IAR, 1960-1961	Dhulia District		Fine reddish gravel	Late Stone Age and microlithic artefacts along with fossilized animal bone were recovered.
145	Talvad-Khurd	IAR, 1960-1961	Dhulia District		Fine reddish gravel	Late Stone Age and microlithic artefacts along with fossilized animal bone were recovered.
146	Nevasa	IAR, 1961-1962	Ahmednagar, Maharashtra		Coarse Gravel, not well cemented overlying Deccan trap rock	Early Stone Age artefacts reported.
147	Bhadne	IAR, 1961-1962	Dhulia District		Lowest gravel	Early Stone Age artefacts comprising of handaxes, cleavers, choppers, discoids and ovates along with microliths were reported.
148	Gondas	IAR, 1961-1962	Dhulia District		Lowest Gravel	Middle Stone Age artefacts comprising of scrapers and points were reported.
149	Nandvan	IAR, 1961-1962	Dhulia District		Gravel clay	Rolled Early Stone Age artefacts reported.
150	Chhandvel	IAR, 1961-1962	Dhulia District		Gravel	Middle Stone Age reported.

151	Perajpur	IAR, 1961-1962	Dhulia District	Gravel	Middle Stone Age reported.
152	Bhadvad-Khurd	IAR, 1961-1962	Dhulia District	Lowest Gravel	Artefacts from late Acheulean to Late Stone Age were reported.
153	Sand Nullah	IAR, 1961-1962	Ramtek	Loose gravel	Middle Stone Age artefacts reported.
154	Chandoli	IAR, 1962-1963	Poona District, Ghod River	Gravel overlaying reddish yellow kankarised silt	Middle Stone Age artefacts reported from the gravel. Two Early Stone Age choppers made on dolerite and few Middle Stone Age artefacts recovered from loose gravel on the river bed.
155	Ralakallava	IAR, 1963-1964	Vedullacheruvu, Andhra Pradesh	Loose Gravel	Early, Middle and Late Stone Age
156	Yeleswaram	IAR, 1963-1964	Yeleswaram District	Gravel layer underlying ikshavaku horizon	Early and Middle Stone Age artefacts from the gravel layer reported.
157	Gudiyum	IAR, 1963-1964	Chingleput District	Lower pebble gravel (GDM I)	Unfinished handaxe
158	Wainganga river	IAR, 1963-1964	Chanda District	Exposed gravel bed	Early and Middle Stone Age artefacts reported.
159	Wardha river	IAR, 1963-1964	Chanda District	Exposed gravel bed	Early and Middle Stone Age artefacts reported.
160	Mhasdi	IAR, 1963-1964	Dhulia District,	Lower and middle and upper gravel beds	Middle Stone Age artefacts from lower gravel, flakes on jasper and agate in middle gravel and agate blade in upper gravel
161	Chande	IAR, 1963-1964	Poona District	Compact sandy gravel capped by yellow silt with kankar	Middle Stone Age tools in gravel
162	Poondi	IAR, 1965-1966		Shale, overlain by laterised shale, overlain by disconformity on laterite surface, overlain by sheet gravel overlain by redeposited laterite and sheet gravel (primary or redeposited again)	Late Acheulean artefacts from sheet gravel underlying the redeposited laterite were reported. Middle Stone Age artefacts from topmost sheet gravel were also reported.

163	Gang Nullah	IAR, 1965-1966		A hard cemented gravel, overlain by loose fine gravel	Flake tools from hard cemented gravel and Middle Stone Age artefacts from loose fine gravel were reported.
164	Rassa Nullah	IAR, 1965-1966		Cemented gravel	Flakes and cores
165	Walgaon	IAR, 1965-1966		Lateritic gravel	Middle and Late Stone Age artefacts reported.
166	Ozarkhed	IAR, 1965-1966		Lateritic gravel	Middle and Late Stone Age artefacts reported.
167	Patna Devi	IAR, 1965-1966		Gravel deposit	Middle Stone Age artefacts comprising of flakes, scrapers, points, on chert, jasper and agate were discovered.
168	Bahadur	IAR, 1965-1966		Stratified gravel	Late Stone Age artefacts reported
169	Jamki	IAR, 1965-1966		Stratified gravel	Late Stone Age artefacts reported
170	Selbari	IAR, 1965-1966		Stratified gravel	Late Stone Age artefacts reported
171	Umbharadi	IAR, 1965-1966		Stratified gravel	Late Stone Age artefacts reported
172	Dhavliviarpada	IAR, 1965-1966		Stratified gravel	Late Stone Age artefacts reported
173	Gangapur	IAR, 1965-1966	Godavari river	Coarse gravel overlaying basal red clay deposit	Early Stone Age artefacts like cores, scrapers, handaxes, cleavers and points on doleritic basalt were reported.
174	Chirki Nalla	IAR, 1967-1968	Ahmednagar District	Armygdullar basalt overlain by rubble gravel capped by sandy gravel	Early and Middle Stone Age artefacts recovered from sandy gravel. Middle stone age artefacts from a tool bearing gravel on the right bank of river Pravara were reported.
175	Jayakwadi Dam	IAR, 1967-1968	Aurangabad District	Exposed gravels at the basal portion of thick older alluvium	Middle Stone Age tools along with semi mineralized bones of <i>bos</i> .
176	Hagargundi	IAR, 1967-1968	Gulbarga District, Bhima river	Sandy pebbly gravel overlain by yellow brown kankary silt	Middle Stone Age artefacts along with fossilized animal bones were discovered.
177	Gurjihar	IAR, 1968-1969		High level gravel	Defined as open air Middle Stone Age workshop site.
178	Hindupur	IAR, 1968-1969		High level gravel	Defined as open air Middle Stone Age workshop site.
179	Inamgaon	IAR, 1968-1969		Gravel deposit	Early Stone Age site
180	Hathkhamba	IAR, 1970-1971		Laterite gravel	Microliths
181	Patna	IAR, 1970-1971	Jalgaon District	Fine gravel Sandy pebbly gravel	Late Stone Age artefacts

182	Kedar Nullah	IAR, 1969-1970	Jalgaon District	Gravel	Early Stone Age artefacts
183	Hiran	IAR, 1971-1972	Jungadh District	Bouldary pebbly gravel	Middle Stone Age artefacts
184	Badalpur	IAR, 1971-1972	Junagadh District	Implimentiferous Fluvial gravel	Unknown composition of the artefacts.
185	Patne	IAR, 1972-1973	Jalgaon District	Dark brown gravel and fine reddish brown gravel	Late Mesolithic artefacts discovered from dark brown gravel and advanced Middle Palaeolithic artefacts from fine reddish brown gravel.
186	Mula-Mutha river	IAR, 1972-1973	Pune District	Lower gravel	Pebble tools
187	Boyapalli	IAR, 1973-1974	Vishakhapatanam District	Three gravels each capped by silt	Late Stone Age artefacts from third gravel and Early Stone Age artefacts reported from the basal gravel.
188	Malampuzha	IAR, 1973-1974	Palghat District	Lateritic fine gravel	Flakes, cores, choppers and a few blades.
189	Shahada	IAR, 1973-1974	Dhule District	Gravels occurring in lower levels	Middle Palaeolithic
190	Sarangkheda	IAR, 1973-1974	Dhule District	Alluvio-colluvial gravel	Late Upper Palaeolithic or Mesolithic
191	Yadgir	IAR, 1974-1975	Gulbarga District	Fine gravel bed capped by dark clay	Middle Stone Age artefacts reported.
192	Hunsgi	IAR, 1974-1975		Exposed gravel deposit	Acheulean assemblage
193	Sangam	IAR, 1975-1976		Colluvial gravel	Middle Palaeolithic artefacts
194	Prakasam Village	IAR, 1975-1976		Implimentiferous thin colluvium	Middle Palaeolithic and Neolithic artefacts
195	Manjra Valley	IAR, 1977-1978		Bed load braided river formation of gravel bars	Early Middle Palaeolithic artefacts
196	Chintalapalem	IAR, 1977-1978	Chittoor District	Fine gravel overlying pebbly gravel	Late Acheulean assemblage form fine gravel: Choppers, chopping tools, handaxes, cleavers, and scrapers.
197	Nandur madhmeshwar	IAR, 1978-1979	Nashik District	Basal gravel bed	Middle Palaeolithic artefacts comprising mainly of scrapers.
198	Gangapur	IAR, 1978-1979	Nashik District	Exposed gravel	Flakes of Acheulean character reported.
199	Right bank of river Ghod	IAR, 1978-1979	Pune District	Well sorted pebbly sandy gravel, dated to 12000 BP	Microlithic artefacts reported.
200	Nagaur	IAR, 1978-1979	Nagaur District	Bouldary, Cobbly sub rounded gravel, well cemented	Lower Palaeolithic artefacts discovered.
201	Satanikota	IAR, 1979-1980	Kurnool District	High Level Gravel	Middle Palaeolithic artefacts comprising of scrapers, awls and borers.
202	Eleru	IAR, 1980-1981	East Godavari District	Gravel beds in older alluvial deposits	Upper Palaeolithic artefacts.

201	Jatpole, Kudavelli, Patkondapur	Aralapadu, Muravkonda,	IAR, 1980-1981	Kurnool District		
203	Badami		IAR, 1980-1981	Malaprabha River (Lower reaches)	Cobbly pebbly gravel	Handaxes and cleavers reported.
204	Cholchud		IAR, 1980-1981	Malaprabha river (Lower reaches)	Modern channel gravels	Middle Palaeolithic artefacts reported.
205	Nandikeshwar		IAR, 1980-1981	Malaprabha river (Lower reaches)	Modern channel gravels	Middle Palaeolithic artefacts reported.
206	Shivyog Mandir		IAR, 1980-1981	Malaprabha river (Lower reaches)	Modern channel gravels	Middle Palaeolithic artefacts reported.
207	Nagrhal		IAR, 1980-1981	Malaprabha river (Lower reaches)	Modern channel gravels	Middle Palaeolithic artefacts reported.
208	Uppinangadi		IAR, 1980-1981	South Kanara District, along the river Netravati	Gravel bed	Mesolithic artefacts comprising of scrapers, blades, borers, burins, lunates, flakes, and cores reported.
209	Mani		IAR, 1980-1981	South Kanara District, along the river Netravati	Gravel bed	Mesolithic artefacts comprising of scrapers, blades, borers, burins, lunates, flakes, and cores reported.
210	Inamgaon		IAR, 1980-1981	Pune District	Sandy pebbly gravel and yellow sandy silt	Middle Palaeolithic artefacts comprising of scrapers, flakes and cores along with vertebrate fossil remains discovered.
211	Muravkonda		IAR, 1980-1981	Kurnool District	High level gravel	Middle Palaeolithic artefacts.
212	Manjra Valley		IAR, 1984-1985	Nizambad District	Cemented bouldary, pebbly gravel	Middle Palaeolithic artefacts.
213	Sadab		IAR, 1989-1990	Gulbarga District	Colluvial gravel	Acheulean assemblage comprising of cleaver, handaxes, knives, cores and flakes reported
214	Bori		IAR, 1989-1990	Pune District	Gravel	Acheulean assemblage.
215	Ranjani		IAR, 1989-1990	Pune District	Weathered gravel	Middle Palaeolithic artefacts.
216	Hunsgi Nullah		IAR, 1996-1997	Gulbarga District	Colluvial gravel	Middle Palaeolithic artefacts.
217	Isampur		IAR, 1998-1999	Gulbarga District	Colluvial gravel	Middle Palaeolithic artefacts.
218	Attirampakam	Pappu, Shanti, <i>et al.</i> Excavation at Attirampakam, Tiruvallur Taluk, District Chengai-Anna.		Chengai-Anna District	Ferricrete gravel overlying clays disconformably	Late Middle Palaeolithic and post Middle Palaeolithic artefacts.
	Shorapur Doab		Paddayya 1971	Gulbarga District	High Level Gravel	

NORTH, WEST AND NORTH WEST						
219	Tajpura	IAR, 1954-1955	Chittorgarh Rajasthan	District,	Gravel beds overlain and underlain by conglomerate beds	Lithics recovered from the gravel beds consisting of large number of cleavers and a few handaxes.
220	Bhangarh	IAR, 1955-1956	Alwar, Rajasthan	Northern	Implement bearing gravel beds alternating with silt deposits	Abevellio-Acheulean type industry
221	Sarupganj	IAR, 1959-1960	River Banas, Rajasthan	Eastern	Cemented gravel	Unknown composition.
222	Gambhiri	IAR, 1961-1962	Chitorgarh Rajasthan	District,	Silt overlaying shale bedrock covered by recent loose gravel	10 tools from lower portion of the gravel including miniature handaxes and cleavers cum handaxes.
223	Hamirgarh	IAR, 1958-1959	Bhilwara Rajasthan	District,	6 ft. thick deposit of cemented gravel capped by 15 ft. of silt	Series I artefacts from cemented gravel comprising of pebble cores, scrapers, choppers, handaxes, cleavers flakes and clactonian flakes.
224	Kapadvanj	IAR, 1958-1959	Sabarkantha Gujrat	District,	Gravelly floodplain terrace of Majham river	Palaeolithic tools including and ovate made in vaal technique; generally made on fine grained quartzite not available locally.
225	Kathiawar	IAR, 1962-1963	Rajkot District, Gujrat		Lower and Upper gravels	Early and Middle Stone Age tools
226	Desalpur, Khari Nullah, Mathal	IAR, 1963-1964	District Kutch, Gujrat		Loose gravel and silt	Middle Stone Age artefacts
227	Bichore	IAR, 1963-1964	Chittorgarh District		Gravel overlain by silt, another gravel layer capped by loamy soil	Early Stone Age artefact from lower gravel comprising of handaxes, cleavers, flakes and scrapers.
228	Kadambali	IAR, 1963-1964	Chittorgarh District		Pebbly gravel, overlain by concretionary clay, overlain by sandy gravel and silt	Early and Middle Stone Age tools from pebbly and sandy gravel.
229	Aditeshwar	IAR, 1966-1967	Broach District		River gravels	Middle Stone Age comprising of cores of various types, blade-flakes, scrapers and burins were reported along with Late Stone Age assemblage comprising of blade and blade cores.
230	Sabhrai	IAR, 1966-1967	Kutch District		Gravels of sai river	Pebble and core tools.
231	Angia	IAR, 1966-1967.	Kutch District		Gravel grading into calcareous red brown silt	Few flakes, one cleaver and a few core like chunks discovered.
232	Dharangandhra	IAR, 1966-1967.	Saurashtra		Well cemented sheet Gravel	Early and Middle Stone Age artefacts.

233	Jetpur and Doraji	IAR, 1966-1967	Saurashtra	Well cemented pebbly sandy gravels	Middle Stone Age artefacts comprising of single and double edged side scrapers, borers, points, blade flakes, simple flakes etc.
234	Umrethi	Pappu	Junagadh District	Bottom to Top: 1. Basalt Deccan Trapp 2. Sandy pebbly gravel 3. Miliolite limestone 4. Gravel layer with sand, silts and clay 5. Miliolite deposit	Lower Palaeolithic artefacts from lowermost gravel layer. Middle Palaeolithic artefacts from second gravel layer.
235	Atkot	IAR, 1969-1970	Rajkot District	Sandy pebbly gravel	Early Stone Age site
236	Khaparia	IAR, 1969-1970	Valsad District	Exposed sandy pebbly gravel on the left bank of river Purna	Large number of flakes
237	Khatgarh	IAR, 1970-1971	River Mej	Loose gravel	Early and Middle Stone Age
238	Khandiala Khad	IAR, 1971-1972	Ambala District	Semi compact gravel bed	A rolled handaxe and a cleaver.
239	Jayal	Pappu	Nagaur District	Gravel Ridge	Lower Palaeolithic
240	Marhanwala	IAR, 1971-1972	Ambala District	Gravel bed	Two heavily rolled large choppers.
241	Markanda Valley	IAR, 1973-1974	Nahan District	River gravel on terraces	Pebble tools, pebble flakes, choppers and scrapers on quartzite.
242	Valley fill miliolites	IAR, 1976-1977	Junagadh District	High Channel Gravels Alluvial gravels and silts	Palaeolithic artefacts of unknown composition were discovered from high channel gravels. Only Middle Palaeolithic artefacts were discovered from alluvial gravel and silt.
243	Jael	IAR, 1977-1978	Nagaur District	Piedmont gravel	Flakes, side scrapers and end scrapers.
244	Mosabar	IAR, 1986-1987	Vadodra District	Cobbly gravel	Acheulean assemblage.
245	Laphni	IAR, 1986-1987	Vadodra District	Cobbly gravel	Acheulean assemblage.
246	Duma	IAR, 1986-1987	Vadodra District	Cobbly gravel	Acheulean assemblage.
247	Baskario	IAR, 1986-1987	Vadodra District	Cobbly gravel	Acheulean assemblage.
248	Uchhet	IAR, 1986-1987	Vadodra District	Cobbly gravel	Acheulean assemblage.
249	Uchhakalam	IAR, 1986-1987	Vadodra District	Cobbly gravel	Acheulean assemblage.
250	Bahadarpur	IAR, 1986-1987	Vadodra District	Cobbly gravel	Acheulean assemblage.
251	Chuchhapura	IAR, 1986-1987	Vadodra District	Cobbly gravel	Acheulean assemblage.
252	Wadeli	IAR, 1986-1987	Vadodra District	Cobbly gravel	Acheulean assemblage.

253	Ratanpur	IAR, 1988-1989.	Vadodra District	River gravel	Secondarily deposited assemblage.	Acheulean
254	Samdhi	IAR, 1988-1989..	Vadodra District	River gravel	Secondarily deposited assemblage	Acheulean
255	Sukhi river	IAR, 1992-1993	Vadodra District	Coarse pebbly gravel	Acheulean assemblage.

Series I and II artefacts in fine gravel layer. Only Series II type of artefacts comprising of points, scrapers, borers, burins, blades, scrapers and flakes. Series II artefacts mostly made on chert, jasper, and chalcedony.
276	Barhai	IAR, 1958-1959	Odisha	Coarse gravel and Fine Gravel	Series I type from Coarse Gravel comprising of handaxes, cleavers and scrapers in addition with chopper chopping tools made on quartzite. Series I and II artefacts in fine gravel layer. Only Series II type of artefacts comprising of points, scrapers, borers, burins, blades, scrapers and flakes. Series II artefacts mostly made on chert, jasper, and chalcedony.
277	Baddih	IAR, 1959-1960	Bankura District, West Bengal	Cemented gravel	Handaxes, ovates and cleavers.
278	Hathikheda	IAR, 1959-1960	Bankura District, West Bengal	Cemented gravel	Handaxes, ovates and cleavers.
279	Chaida	IAR, 1959-1960	Bankura District, West Bengal	Cemented gravel	Handaxes, ovates and cleavers.
280	Kuchai	IAR, 1961-1960	Mayurbhanj District, Odisha	Gravel mixed with greyish earth and loose laterite	Microliths essentially of non-geometric character reported.
281	Dhalkishore	IAR, 1961-1960	Bankura District	Lateritic Gravel	Unifacial and bifacial choppers on pebbles, handaxes, cleavers on core and flakes reported.
282	Kasabanti	IAR, 1961-1962	Bankura District	Lateritic Gravel	Unifacial and bifacial choppers on pebbles, handaxes, cleavers on core and flakes reported.
283	Kumari valley	IAR, 1961-1962	Bankura District	Lateritic Gravel	Unifacial and bifacial choppers on pebbles, handaxes, cleavers on core and flakes reported.

284	Goplapur,	IAR, 1962-1963	Singhbum District, Subarnekh R. Bank	Gravel overlain by clay	Early and Middle Stone Age artefacts.
285	Harindubri	IAR, 1962-1963	Singhbum District, Subarnekh R. Bank	Gravel overlain by clay	Early and Middle Stone Age artefacts.
286	Hirjihati	IAR, 1962-1963	Singhbum District, Subarnekh R. Bank	Gravel overlain by clay	Early and Middle Stone Age artefacts.
287	Jaganathpur	IAR, 1962-1963	Singhbum District, Subarnekh R. Bank	Gravel overlain by clay	Early and Middle Stone Age artefacts.
288	Murganhata	IAR, 1962-1963	Singhbum District, Subarnekh R. Bank	Gravel overlain by clay	Early and Middle Stone Age artefacts.
289	Thakurani,	IAR, 1962-1963	Singhbum District, Subarnekh R. Bank	Gravel overlain by clay	Early and Middle Stone Age artefacts.
290	Tumangdungri	IAR, 1962-1963	Singhbum District, Subarnekh R. Bank	Gravel overlain by clay	Early and Middle Stone Age artefacts.
291	Sebalgiri	IAR, 1966-1967	Garohills	Eroded gravelly surface	Five handaxes, two picks, five discs, one hundred and fifty eight scrapers, twenty borers, sixty six blades, twenty six large knives and points, arrowheads, spearheads etc. reported.
292	Chibrigiri	IAR, 1972-1973	Garohills	Coarse gravel	Early Stone Age artefacts.
293	Ghurghutipara	IAR, 1973-1974	Burdwan District	Top of the gravel bed	Microlithic blades, flakes on quartz, chalcedony, jasper and chert.
294	Rongram	IAR, 1977-1978	Garohills	Weather bouldary-pebbly gravel	Stone age artefacts
295	Daridungri	IAR, 1983-1984	Saran District	Lateritic gravel	Early, Middle and Late stone age artefacts reported from lateritic gravel.
				Loose gravel on the paleochannel of Mahanadi	Cleavers and handaxes discovered in the loose gravel in the palaeochannel.
296	Brahmani Nullah	IAR, 1983-1984	Sundargarh District	Gravel Bed	Handaxes, cleaver, chopper and chopping tool.
297	Sankh Nullah	IAR, 1983-1984	Sundargarh District	Gravel Bed	Handaxes, cleaver, chopper and chopping tool.
298	Deo Nullah	IAR, 1983-1984	Sundargarh District	Gravel Bed	Handaxes, cleaver, chopper and chopping tool.
299	Jhirpani	IAR, 1983-1984	Sundargarh District	Fine gravel	Middle Palaeolithic artefacts
300	Susunia	IAR, 1985-1986	Bankura District	gravel	Early Stone Age artefacts
301	Maluti	IAR, 1988-1989.		Channel gravel	Acheulean
302	Middle reaches of Chillah river	IAR, 1988-1989.		Fluvial gravel	Scrapers, points, borers, notches

303	Balangi	IAR, 1999-2000	Angul District	Gravel deposit Cemented gravel	Waterborne Mesolithic fluted cores from gravel deposit. Neolithic chisel and adze reported from cemented gravel.
304	Bilinda	IAR, 1999-2000	Angul District	Gravel deposit	Lower Palaeolithic scraper and handaxe.
305	Ekagharia	IAR, 1999-2000	Angul District	Alluvium mixed with gravel deposit	Lower Palaeolithic handaxe, Neolithic chisel and mace head.
